59 of 62 review helpful Comparison between 3rd revised and this By Vin I have both the 3rd edition revised reprint and the 4th edition so this review it s mainly intended to highlight the differences between the two They re both

excellent books and if you've ever read Goljan you know what to expect. As for the differences: 1. The book is longer. By about 150-200 pages. That may not be a good thing, depending. Get the most from your study time and experience a realistic USMLE simulation. Rapid Review Pathology by Edward F. Goljan MD makes it easy for you to master all of the pathology material covered on the USMLE Step 1. It combines an updated outline format review of key concepts and hundreds of full-color images and margin notes PLUS more than 400 USMLE-style online questions. Get all the practice you need to succeed on the USM. This is an excellent update to a strong pathology review book. It includes current information and offers deeper explanations for students interested in further diagnostic options. Audrey Deeken, BA, University of Kansas School of Medicine, Doody 87:100.
