8 of 9 review helpful Disappointed I will return my copy for a full refund By HerroGoodbye Let me start my review by saying that most of the things here can be learned from shadowing a doctor or with a quick and simple google search However one of the unique aspects of this book is that it is full of anecdotal stories about what its like to apply to medical school undergo the four years of medical school survive resid Everything They Don t Tell You Everything You Need to Know Becoming a doctor is so much more than acing your MCATs living through med school then getting the perfect residency It is a career that demands long hours on little to no sleep constant continuing education and a tough decision about which of the many types of medicine you want to practice But with the right guide you can make the right choices each step of the way About the Author Tania Heller is an MD and a Fellow of the American Academy of Pediatrics educated in South Africa and trained at Georgetown She has worked in a variety of types of medicine and has more than 20 years of experience as a doctor
