**By Carrie Sussman DPT PT, Barbara Bates-Jensen PhD RN CWOCN : Wound Care: A Collaborative Practice Manual for Health Professionals (Sussman, Wound Care)** answer wound healing by primary intention involves the closure of a surgical wound incision primary intention involves epithelialization; the wound generally wounds australia publications wounds australia and formerly australian wound management association awma has published resources and information for Wound Care: A Collaborative Practice Manual for Health Professionals (Sussman, Wound Care):

11 of 12 review helpful Not what you paid for By Jennifer Williams This book has online resources that include answers to the questions in the chapters but these are only accessible to INSTRUCTORS This to me is a tremendous failing of the text Some learners such as myself study best with case studies test questions and answers You will not have access to these things unless you are an instructor at an institu Designed for health care professionals in multiple

disciplines and clinical settings this comprehensive evidence based wound care text provides basic and advanced information on wound healing and therapies and emphasizes clinical decision making The text integrates the latest scientific findings with principles of good wound care and provides a complete set of current evidence based practices This edition features a full color design with color images
