The "PCS" in ICD-10-PCS codes stands for the procedural classification system. ICD-10-PCS is a completely separate medical coding system from ICD-10-CM, containing an additional 87,000 codes for use ONLY in United States inpatient, hospital settings. The procedure classification system (ICD-10-PCS) was developed by the Centers for Medicare and Medicaid Services (CMS) in conjunction with 3M Health Information Management (HIM).

ICD-10-PCS is used only for inpatient, hospital settings in the United States, and is meant to replace volume 3 of ICD-9 for separate reporting of inpatient procedures. Due to the rapid and constant state of flux in medical procedures and technology, ICD-10-PCS was developed to accommodate the changing landscape. Common procedures, lab tests, and educational sessions that are not unique to the inpatient, hospital setting have been omitted from ICD-10-PCS.

Code(s)	Description
0016070 - B245Z23	Section 0 - Medical and Surgical

0 of 0 review helpful Waste of money By Holly M this was no help what so ever and a waste of my money 0 of 1 review helpful Four Stars By Leapyear366 Very helpful 1 of 2 review helpful Five Stars By Customer great Medical Coding ICD 10 PCS is the newest procedure coding system There are a total of 72 081 codes included in ICD 10 PCS

Each of the seven alphanumeric characters used in each code represents something specific A chart would be very beneficial in trying to decipher what each code s letter or number represents For example the first number of the code represents the type of service that was rendered Other characters used represents a body system body part or region
