0 of 0 review helpful learning and teaching medicine from the art By P Harvey I have used this book a lot in my work It presents ways of incorporating the arts visual narrative drama film music into medical education specifically and so of course in health professional education generally Each chapter is a framework of ideas on how to utilise the arts in everyday teaching The frameworks are easy to follow it s This is a revised and updated version of MCQs in Applied Basic Sciences for the FRCS 2nd edition and has been adapted to suit other examinations with a basic science component such as the MRCP MRCS AFRCS and MRCOG The book should be of interest to those doctors in training preparing for their professional examinations It is divided into sections to make selective revision easier and each questions is accompanied by an explanatory answer
